VPN Setup Guide

Scenario: A remote employee needs secure access to internal systems.

Steps:

1. Download the approved VPN client from the company portal.

2. Install the VPN client on your device.

3. Launch the VPN application and enter your credentials.

4. Select the appropriate VPN profile (e.g., 'Corporate Access').

5. Click 'Connect' and wait for the secure tunnel to establish.

Troubleshooting:

- Ensure your internet connection is stable.

- Verify that your credentials are correct.

- Contact ServiceDesk if the VPN profile is missing.
